TEF Bronze

This award was made in June 2019.

The TEF Panel reviewed the provider metrics and provider submission according to the process and criteria specified in the TEF guidance.

The provider metrics supplemented by the submission indicate that most students achieve good outcomes. Levels of full-time student satisfaction with teaching on my course, and assessment and feedback are high, and for academic support the level is exceptionally high and above benchmark. The provider is below its benchmark for student continuation rates, and rates of progression to highly skilled employment or further study. The panel judged that this was partially addressed in the submission.

The Panel considered the provider's submission in relation to the TEF criteria and its judgement reflects, in particular, evidence of:

- course design and assessment practices that provide sufficient stretch for ensuring good engagement and commitment to learning and study from most students
- good levels of student satisfaction which stem from the introduction of an effective new institutional online feedback system
- high quality library resources and services which are responsive to student needs.

Overall, the TEF Panel judged that the combination of evidence in the provider metrics and the provider submission best fits the descriptor for a Bronze award.
