TEF Bronze

This award was made in June 2019.

The TEF Panel reviewed the provider metrics and provider submission according to the process and criteria specified in the TEF guidance.

The provider metrics indicate that most students achieve good outcomes. Based on the available data, the provider metrics are broadly consistent with its benchmarks. In particular, the Panel noted that for full-time students there are high rates of progression to highly skilled employment or further study, but low rates for employment or further study. The Panel judged that this was only partially addressed in the submission.

The Panel considered the provider's submission in relation to the TEF criteria and its judgement reflects, in particular, evidence of:

- teaching that provides effective stimulation and encourages students to engage and actively commit to their studies
- effective support mechanisms that enable students to develop their academic, personal and professional potential, including individualised support packages for students with disabilities and specific learning needs
- course design and assessment practices that provide scope for stretch
- sufficient levels of contact time, including personalised provision, secures good engagement and commitment to learning and study from most students.

Overall, the TEF Panel judged that the combination of evidence in the provider metrics and the provider submission best fits the descriptor for a Bronze award.
