Summary

1. This document describes the Higher Education Students Early Statistics Survey 2020-21 (HESES20) comparison files supplied as part of the 2020-21 Individualised Learner Record (ILR) post-collection outputs and the algorithms used to generate the data needed to recreate HESES20 from 2020-21 ILR data. Throughout the document, fields taken or derived from the ILR record are shown in capitals.
2. The HESES20 comparison output should be used by staff responsible for individualised data returns at higher education providers. This document is intended to help you understand in detail how the 2020-21 ILR R14 data compares with the in-year HESES20 data, and to highlight significant differences between the two.
3. The HESES20 comparison output is formed of two files. These are:
 - a. HESES20 comparison workbook 'HES20_XXXXXXXX.xlsx' (where XXXXXXXXX is the UK Provider Reference Number (UKPRN) for the provider). This is supplied for the reconciliation exercise.
 - b. HESES20 comparison individualised file 'HES20_XXXXXXXX_IND.csv'. This is supplied for the reconciliation exercise and funding data summaries and may also be useful in interpreting the use of 2020-21 ILR data in the calculation of student premium allocations.

Details of how to use individualised files are given on the Office for Students (OfS) website (www.officeforstudents.org.uk/data-and-analysis/supplying-data/working-with-individualised-files/).

4. These files can be accessed from the '2020-21 Post-collection outputs' area of the OfS portal. Details will be emailed to the named student data contacts at providers when outputs become available.
5. This document is aimed at readers with in-depth knowledge of the data. Readers are advised to refer to 'Specification of the Individualised Learner Record for 2020 to 2021' (available from the Education and Skills Funding Agency at <https://guidance.submit-learner-data.service.gov.uk/previous/20-21/ilr>), 'HESES20 – Higher Education Students Early Statistics survey 2020-21' (www.officeforstudents.org.uk/publications/heses20/) and the latest individualised files for the HESES19 comparison and the HEIFES18 comparison when using this document.

- The difference sheets (see worksheets ending in 'diff' in Table 1) will indicate where differences between the HESES20 recreation tables and HESES20 tables exceed a given threshold. The size of this threshold can be altered by entering the required value where indicated on the worksheets. These sheets are to assist providers in reconciling differences between HESES20 data and the HESES20 recreation data.
- Providers are strongly encouraged to use the 'Rebuild_summary' worksheet in the 'HES20_XXXXXXXX.xlsx' workbook which may highlight data quality issues relating to the ILR fields used in the HESES20 recreation algorithms.

HESES20 comparison individualised file

- When working through this technical document it is necessary to use the individualised file, 'HES20_XXXXXXXX_IND.csv'. The individualised file contains the values of all fields used to generate the HESES20 comparison output.
- Fields taken from the 2020-21 ILR return or derived as part of the HESES20 comparison output are shown in capitals using the names given in Table 2 and Table 3 respectively.
- Specific instructions for rebuilding the HESES20 comparison workbook from the individualised file are provided in the HESES20 comparison rebuild document.
- The individualised file contains one record per year of instance (each unique combination of UKPRN, LEARNREFNUMBER, AIMSEQNUMBER and STUBID) in the 2020-21 academic year.

STUBID

18. This field identifies years of instance when used in conjunction with UKPRN, LEARNREFNUMBER, and AIMSEQNUMBER. Where there are two years of instance within a single academic year, we create two records in the individualised file. This can happen where the student undertakes activity both before and after the anniversary of their commencement date and has not undertaken activity in the year of instance in the previous academic year. These records are distinguished using STUBID.

26. This field contains the expected length of the course in whole numbers of years, calculated from the difference between LEARNSTARTDATE and LEARNPLANENDDATE. Expected course lengths that contain a fraction of a year that exceeds two weeks are rounded up to the next whole year. Otherwise, the value is rounded down to the nearest whole number of years, except where the expected course length is less than one year – such expected course lengths will be rounded up to one year. HESAVRGFTEPOP

46. HESAVRGFTEPOP is used to identify students who are on a non-standard year of instance, with a non-blank STULOAD and who are not explicitly excluded from the HESES population. These students are then used to calculate the average FTE to apply to students on non-standard years who have an instance that starts in the current academic year (HESFTE_CASE = 1).

47. The 2020-21 average FTE population is defined as follows:

Value	Description	Definition

Value	Description
1	There are 10 or more students in the 2020-21 average FTE population (HESAVRGFTEPOP = 1) at a given provider (UKPRN) who have the same recognised HE qualification aim (OFSQAIM), HESES mode (HESMODE) and expected course length (HESCRSELGTH)

2018-19 HESEXCL = 0 and

2018-19 HESCOMP ≠ 3 and

2018-19 HESMODE = PT.

HESAVRGFTE

49. This field gives the average STULOAD for the population identified in HESAVRGFTETYPE. This field is only completed for students on non-standard years of instance (TYPEYR ≠ 1).

⁵ 2018-19 data is used instead of 2019-20 data due to the exceptional guidance on the return of FUNDCOMP in 2019-20.

Example

50. A provider only has 46 students in the 2020-21 average FTE population.

2020-21 UKPRN	2020-21 OFSQAIM	2020-21 HESMODE	2020-21 HESCRSELGTH	TOTAL
10000000	FIRST	PT	1	25
10000000	FIRST	PT	2	9
10000000	FIRST	PT	3	12

For a student at this provider with OFSQAIM = FIRST, HESMODE = PT and HESCRSELGTH = 1, HESAVRGFTETYPE would be 1 as there are more than 10 students in the average FTE population that match on OFSQAIM, HESMODE and HESCRSELGTH.

For a student at this provider with OFSQAIM = FIRST, HESMODE = PT and HESCRSELGTH = 2, HESAVRGFTETYPE would be 2 as there are fewer than 10 students in the 2020-21 average FTE population that match on OFSQAIM, HESMODE and HESCRSELGTH, but there are at least 10 (46) that match on OFSQAIM alone.

HESFTE_CASE

51. For part-time years of instance, the method used to calculate HESESFTE is dependent on the following factors:

- a. Number of years of instance generated in the HESES recreation.
- b. Whether the year of instance in the current academic year is standard or non-standard.
- c. Whether the year of instance in the previous academic year was standard or non-standard.
- d. Whether the instance started in the current academic year.

The table below shows how we identify different cases of FTE calculation.

Value	Description	Definition
0	Standard year of instance	STUBID = 0 and TYPEYR = 1
1	Non-standard year of instance and the instance starts in the current academic year	STUBID = 0 and TYPEYR = 2 and LEARNSTARTDATE > 31 July 2020
2	Non-standard year of instance and the instance does not start in the current academic year	STUBID = 0 and TYPEYR = 2 and LEARNSTARTDATE < 1 August 2020
When two countable years of instance are generated:		
3a	First countable year of instance	STUBID = 1
3b	Second countable year of instance	STUBID = 2

HESESFTE

52. This field contains the FTE we assume for the year of instance.

Value*	Definition
100	HESMODE = FTS

HESAVRGFTE	HESFTE_CASE = 1 and not above
STULOAD	HESFTE_CASE = 2 and not above
Provider specific override	HESFTE_CASE = 3a

*HESESFTE is capped at 100. HESESFTE will be set to 0 if HESFTE_CASE is blank.

HESEXCL

Value	Description	Definition
64	No price group information and FTE of at least 0.03	EXCL64 = 1
0	Otherwise	None of the above

67. This field contains the exclusion reason(s) for the student. It is calculated as $(1 \times \text{EXCL1}) + (2 \times \text{EXCL2}) + \dots + (64 \times \text{EXCL64})$. The reason(s) which contribute to the exclusion of a student can therefore be calculated. For example, if HESEXCL = 13, by subtracting figures from the above table starting at the bottom, we see that the student has an FTE of less than 0.03 (EXCL8 = 1), is explicitly excluded from the HEIFES student population (EXCL4 = 1) and is not active in the academic year (EXCL1 = 1).

HESYATYPE

0	Otherwise	Otherwise

HESNEWENTRANT

70. This field indicates whether a student is a new entrant. Where a student starts more than one countable year of instance at the same broad level in the same academic year and could be considered as a new entrant for each countable year, they will be recorded as a new entrant for only one. If one such countable year has an earlier start date than the others the student will be recorded as a new entrant for that countable year.

Value	Description	Definition
1	Student first generates a countable year of instance for a higher education course recognised for OfS funding purposes and has not been active at the same broad level at the registered provider in either of the two previous academic years	LEARNSTARTDATE > 31 July 2020 and HESEXCL = 0 and ((HESBROADLEVEL = UG and HESUG19 = 0, BLANK and HESUG18 = 0, BLANK) or (HESBROADLEVEL = PGT and HESPGT19 = 0, BLANK and HESPGT18 = 0, BLANK))
