Table F: 2020-21 Student premium allocations	15

Summary

1. This document describes how the Higher Education Students Early Statistics (HESES) recreation data can be rebuilt from the HESES19 comparison individualised file.
2. The HESES19 comparison is formed of two files. These are:
 - a. HESES19 comparison workbook 'HES19_DCT_100XXXXX.xlsx'.
 - b. HESES19 comparison individualised file 'HES19_DCT_100XXXXX_IND.csv'.
3. Further details on each aspect of the calculation of teaching grant can be found in the 'Annual funding' section of the Office for Students (OfS) website under www.officeforstudents.org.uk/advice-and-guidance/funding-for-providers/annual-funding/.
4. Each section of this document details how to rebuild specific populations of students that appear on the tables in the HESES19 comparison workbook. These tables are listed below.

Worksheet	Title
1 Full-time	HESES19 recreation Table 1: Full-time counts of years of instance
2 Sandwich	HESES19 recreation Table 2: Sandwich year out counts of years of instance
3 Part-time	HESES19 recreation Table 3: Part-time counts of years of instance and full-time equivalence (FTE)
4 Year abroad	HESES19 recreation Table 4: Home and EU undergraduate years abroad
5 Planning	HESES19 recreation Table 5: Further student breakdowns for planning purposes
6a Health full-time	HESES19 recreation Table 6a: Full-time counts of years of instance on pre-registration health courses
6b Health sandwich	HESES19 recreation Table 6b: Sandwich year out counts of years of instance on pre-registration health courses
6c Health part-time	HESES19 recreation Table 6c: Part-time counts of years of instance and FTE on pre-registration health courses
A Summary	2020-21 Grant tables Table A: 2020-21 Summary of allocations
B High-cost	2020-21 Grant tables Table B: 2020-21 High-cost subject funding
C NMAH supplement	2020-21 Grant tables Table C: 2020-21 Nursing, midwifery and allied health supplement
D Erasmus+	2020-21 Grant tables Table D: 2020-21 Erasmus+ and overseas study programmes

Worksheet	Title
E Other high-cost TAs	2020-21 Grant tables Table E: 2020-21 Other high-cost targeted allocations
F Student access and success	2020-21 Grant tables Table F: 2020-21 Student access and success
G Parameters	2020-21 Grant tables Table G: 2020-21 Parameters in the funding models

HESES19 tables recreated using 2019-20 HESA Student data

Changes due to the coronavirus (COVID-19) pandemic

5. The COVID-19 exceptional guidance for the 2019-20 Higher Education Statistics Agency (HESA) Student record states that FUNDCOMP should be returned in a way that minimises burden. Consequently, this field cannot be used reliably to identify students that did not complete their year of instance. Normally we would derive HESCOMP, a field that identifies whether a student has completed their year of instance, from FUNDCOMP. Instead, we have applied non-completion rates from the equivalent HESES19 data to each year of instance in the HESES19 population, so that each year of instance contributes partially to Column 3 (years not completed) and partially to Column 4 (completed years). This means that, for the HESES19 comparison, HESCOMP cannot be used to filter records in the individualised file. However, Columns 3 and 4 can still be rebuilt using some additional fields, as described below.

Table 1: Full-time counts of years of instance

6. For the population of students that appear in this table, the first filters to apply to the individualised file are:

HESEXCL = 0

HESMODE = FTS

7. Additional filters can be applied to specify students in a particular cell, such as filtering by price group, length of year of instance, level of study, and residential and fundability status.

Derived field	Definition	Values and definitions
PRGA, PRGB, PRGC1, PRGC2, PRGD	Used to filter to a specific price group	PRGA ≠ 0 for price group A. PRGB ≠ 0 for price group B. PRGC1 ≠ 0 for price group C1. PRGC2 ≠ 0 for price group C2. PRGD ≠ 0 for price group D.
LENGTH	Used to filter to the length of year of instance	LENGTH = S for students on a standard length of year of instance. LENGTH = L for students on a long length of year of instance.
HESLEVEL	Used to filter to the level of study	HESLEVEL = UG for students on an undergraduate course. HESLEVEL = PGT_UGF for students who are postgraduate taught and eligible under the undergraduate student support regime. HESLEVEL = PGT_ML for students who are on postgraduate taught courses that are eligible under the masters' loan arrangements. HESLEVEL = PGT_OTH for students who are on postgraduate taught courses that do not fall under the previous two categories. HESLEVEL = PGR for students who are on postgraduate research courses.

Derived field	Definition	Values and definitions
HESTYPE	Used to filter to the residential and fundability status of the year of instance	HESTYPE = HOMEF for Home and EU fundable. HESTYPE = HOMENF for Home and EU non-fundable. HESTYPE = ISOV for Island and overseas.
HESREG	Used to filter Column 1 and Column 2 years of instance	HESREG = 1 for Column 1. HESREG = 2 for Column 2.

8. For example, to filter to years of instance on this table that are fundable, in Column 1, and on a standard length year of instance of an undergraduate course, the filters to apply to the individualised file are the following:

HESEXCL = 0

HESMODE = FTS

LENGTH = S

HESLEVEL = UG

HESTYPE = HOMEF

HESREG = 1.

To find the estimated number of completed years of instance (i.e., recorded in Column 4 of the HESES19 recreation), sum the values of HESCOL4. To find the estimated number of years of instance that were not completed (i.e., recorded in Column 3 of the HESES19 recreation), sum the values of HESCOL3. To find the estimated FTE, sum the values of HESCOL4A. The Column 3 and Column 4 totals may not be whole numbers, but the sum of these totals will equal the number of years of instance found by applying the filters above.

9. For example, to filter to years of instance on this table that are fundable, in Column 1, in price group C1, and on a standard length year of instance of an undergraduate course, the filters to apply to the individualised file are:

HESEXCL = 0

HESMODE = FTS

PRGC1 ≠ 0

LENGTH = S

HESLEVEL = UG

HESTYPE = HOMEF

HESREG = 1.

To find the total years of instance meeting these criteria, sum the values of PRGC1. Of these years, the number estimated to have not been completed (i.e., recorded in Column 3 of the HESES19 recreation) is the sum of the values of HESCOL3_C1, and the number estimated to have been completed (i.e., recorded in Column 4 of the HESES19 recreation) is the sum of the

values of HESCOL4_C1. The Column 3 and Column 4 totals may not be whole numbers, but the sum of these totals will equal the sum of the values of PRGC1. In summary, (sum of HESCOL3_Y) + (sum of HESCOL4_Y) = (sum of PRGY), where Y is the price group. The FTE of the years of instance found by applying the filters above is the sum of the values of FTEC1 divided by 100.

Table 2: Sandwich year out counts of years of instance

10. For the population of students that appear in this table, the first filters to apply to the individualised file are:

HESEXCL = 0

HESMODE = SWOUT.

11. Further filters to apply are the same as those in Table 1: Full-time counts of years of instance.

12. To find the total years of instance in this population, sum the values of PRGC2. Of these years, the number estimated to have not been completed (i.e., recorded in Column 3 of the HES19 recreation) is the sum of the values of HESCOL3_C2, and the number estimated to have been completed (i.e., recorded in Column 4 of the HES19 recreation) is the sum of the values of HESCOL4_C2. The Column 3 and Column 4 totals may not be whole numbers, but the sum of these totals will equal the sum of the values of PRGC2. The FTE of these years of instance is the sum of the values of FTEC2 divided by 100.

Table 3: Part-time counts of years of instance and FTE

13. For the population of students that appear in this table, the first filters to apply to the individualised file are:

HESEXCL = 0

HESMODE = PT.

14. Further filters that can be applied are the same as those in Table 1: Full-time counts of years of instance.

15. For example, to filter to years of instance on this table that are fundable, in Column 2 and on a standard length year of instance of an undergraduate course, the filters to apply to the individualised file are:

HESEXCL = 0

HESMODE = PT

LENGTH = S

HESLEVEL = UG

HESLEVEL = UG

HESREG = 2.

To find the estimated number of completed years of instance (i.e., recorded in Column 4 of the HESES19 recreation), sum the values of HESCOL4. To find the estimated number of years of instance that were not completed (i.e., recorded in Column 3 of the HESES19 recreation), sum the values of HESCOL3. To find the estimated FTE (i.e., recorded in Column 4a of the HESES19 recreation), sum the values of HESCOL4A. The Column 3 and Column 4 totals may not be whole numbers, but the sum of these totals will equal the number of years of instance found by applying the filters above.

16. For example, to filter to years of instance on this table that are fundable, in Column 1, in price group D, and on a standard length year of instance of an undergraduate course, the filters to apply to the individualised file are:

HESEXCL = 0

HESMODE = PT

PRGD ≠ 0

LENGTH = S

HESLEVEL = UG

HESATYPE = HOMEF

HESREG = 1.

To find the total years of instance meeting these criteria, sum the values of PRGD. Of these years, the number estimated to have not been completed (i.e., recorded in Column 3 of the HESES19 recreation) is the sum of the values of HESCOL3_D, and the number estimated to have been completed (i.e., recorded in Column 4 of the HESES19 recreation) is the sum of the values of HESCOL4_D. The Column 3 and Column 4 totals may not be whole numbers, but the sum of these totals will equal the sum of the values of PRGD. In summary, (sum of HESCOL3_Y) + (sum of HESCOL4_Y) = (sum of PRGY), where Y is the price group. The FTE of the years of instance found by applying the filters above (which is recorded in Column 4a of the HESES19 recreation) is the sum of the values of FTED divided by 100.

Table 4: Home and EU undergraduate years abroad

17. For the population of students that appear in this table, the first filter to apply to the individualised file is HESYAPOP = 1.
18. For students on an outgoing Erasmus+ year abroad, the filter to apply to the individualised file is HESATYPE = ERASMUS.
19. For students taking an outgoing year abroad outside the Erasmus+ programme the filter to apply to the individualised file is HESATYPE = OTHER.
20. To identify whether a student is in Column 1 or Column 2 of the table filter to HESREG = 1 or HESREG = 2 respectively.
 - a. To identify students in Column 1(a) and Column 2(a) the filter to apply to the individualised file is HESMODE = FTS.

b. To identify students in Column 1(b) and Column 2(b) the filter to apply to the individualised file is HESMODE = SWOUT.

21. A further filter can be applied to HESTYPE to filter to students who are either fundable (HESTYPE = HOMEF) or non-fundable (HESTYPE = HOMENF).

22. To find the total headcount of students sum the variable HESYAPOP.

Table 5: Further student breakdowns for planning purposes

23. For the population of students that appear in this table, the first filter to apply to the individualised file is HESEXCL = 0.

24. To further filter these students, the following fields can be used:

HESLEVEL

HESREG

HESTYPE

HESRESSTAT

HESMODE.

25. For example, to filter to full-time students on this table that are in Column 1, on an undergraduate course, are fundable and UK-domiciled, then the filters to apply to the individualised file are as follows:

HESEXCL = 0

HESREG = 1

HESLEVEL = UG

HESMODE = FTS

HESRESSTAT = HOMEF_UK.

26. To find the equivalent population of new entrants (i.e., students in Section B of this table), apply the above filters as well as HESNEWENTRANT = 1. To find the total headcount of this population sum the HESNEWENTRANT variable.

Table 6a: Full-time counts of years of instance on pre-registration health courses

27. For the population of students that appear in this table, the first filters to apply to the individualised file are:

HESEXCL = 0

HESHEALTHPOP = 1

HESMODE = FTS.

28. To identify OfS-fundable students in Column 1(a) and Column 2(a), the filter to apply to the individualised file is HESTYPE = HOMEF.
29. To identify non-fundable starters in 2016-17 in Column 1(b)(i) and Column 2(b)(i), the filters to apply to the individualised file are:
- HESTYPE = HOMENF
HESHEALTHYEAR = 2016-17
HESLEVEL = UG
HESHEALTHPROF1 ≠ DENTHE, DENHYG.
30. To identify non-fundable starters in 2017-18 in Column 1(b)(ii) and Column 2(b)(ii), the filters to apply to the individualised file are:
- HESTYPE = HOMENF
HESHEALTHYEAR = 2017-18.
- a. To identify the undergraduate students included in these columns, the filters to apply are:
- HESLEVEL = UG
HESHEALTHPROF1 = DENTHE, DENHYG.
- b. To identify the postgraduate students included in these columns, the filters to apply are:
- HESLEVEL = PGT_UGF
HESHEALTHPROF1 ≠ DENTHE, DENHYG.
31. The students included in Column 1(b)(iii) and Column 2(b)(iii) are those with HESTYPE = HOMENF who do not meet the criteria in paragraphs 29 and 30.
32. To identify starters in 2019-20, the filter to apply to the individualised file is HESHEALTHYEAR = 2019-20.
33. To identify students in a particular profession, the filters to apply to the individualised file are HESHEALTHPROF1 and HESHEALTHPROF2.
34. Further filters can be applied to identify students with a particular length of year of instance or level of study.
35. For example, to identify OfS-fundable students who are on a full-time, undergraduate level, standard length podiatry course, then the filters to apply to the individualised file are:
- HESEXCL = 0
HESHEALTHPOP = 1
HESMODE = FTS
HESTYPE = HOMEF
HESHEALTHPROF1 = PODCHI

LENGTH = S

HESLEVEL = UG.

To find the estimated number of completed years of instance (i.e., recorded in Column 4 of Table 6a of the HESES19 recreation), sum the values of HESCOL4. To find the estimated number of years of instance that were not completed (i.e., recorded in Column 3 of Table 6a of the HESES19 recreation), sum the values of HESCOL3. To find the estimated FTE, sum the values of HESCOL4A. The Column 3 and Column 4 totals may not be whole numbers, but the sum of these totals will equal the number of years of instance found by applying the filters above.

36. Providers with pre-registration nursing, midwifery and allied health courses that are split between two professions will also need to use HESHEALTHPROF2 to identify these students.
37. For example, to identify OfS-fundable students who are on a full-time, postgraduate level, standard length course split between 'Nursing – adult' and 'Nursing – mental health', then the filters to apply to the individualised file are:

HESEXCL = 0

HESHEALTHPOP = 1

HESMODE = FTS

HESTYPE = HOMEF

HESHEALTHPROF1 = NURSAD, NURSMH

HESHEALTHPROF2 = NURSAD, NURSMH

LENGTH = S

HESLEVEL = PGT_UGF.

To find the total years of instance meeting these criteria, sum the values of HESHEALTHPOP. Half of the years of instance found by applying these filters will be counted as 'Nursing – adult' in Table 6a, and the other half will be counted as 'Nursing – mental health'. Of the years of instance counted as 'Nursing – adult', the number estimated to have not been completed (i.e., recorded in Column 3 of Table 6a of the HESES19 recreation) is the sum of the values of HESCOL3_PROF1 (where HESHEALTHPROF1 = NURSAD and HESHEALTHPROF2 = NURSMH) and HESCOL3_PROF2 (where HESHEALTHPROF1 = NURSMH and HESHEALTHPROF2 = NURSAD), and the number estimated to have been completed (i.e. recorded in Column 4 of Table 6a of the HESES19 recreation) is the sum of the values of HESCOL4_PROF1 (where HESHEALTHPROF1 = NURSAD and HESHEALTHPROF2 = NURSMH) and HESCOL4_PROF2 (where HESHEALTHPROF1 = NURSMH and HESHEALTHPROF2 = NURSAD). The Column 3 and Column 4 totals may not be divisible by 0.5, but the sum of these totals will equal the years of instance counted as 'Nursing – adult' in Columns 1 and 2 of Table 6a when the filters above are applied. The estimated FTE of the total years of instance found by applying the filters above is the sum of the values of HESCOL4A.

Table 6b: Sandwich year out counts of years of instance on pre-registration health courses

38. For the population of students that appear in this table, the first filters to apply to the individualised file are:

HESEXCL = 0

HESHEALTHPOP = 1

HESMODE = SWOUT.

39. To identify students in the different columns, apply filters as set out in paragraphs 28 to 32.

40. Similar filters can be applied to those in paragraphs 35 and 37 to identify students counted in a particular row.

41. To find the total years of instance in this population, sum the values of PRGC2. Of these years, the number estimated to have not been completed (i.e., recorded in Column 3 of Table 6b of the HESES19 recreation) is the sum of the values of HESCOL3_C2, and the number estimated to have been completed (i.e., recorded in Column 4 of Table 6b of the HESES19 recreation) is the sum of the values of HESCOL4_C2. The Column 3 and Column 4 totals may not be whole numbers, but the sum of these totals will equal the sum of the values of PRGC2. The FTE of these years of instance is the sum of the values of FTEC2 divided by 100.

Table 6c: Part-time counts of years of instance on pre-registration health courses

42. For the population of students that appear in this table, the first filters to apply to the individualised file are:

HESEXCL = 0

HESHEALTHPOP = 1

HESMODE = PT.

43. To identify students in the different columns, apply filters as set out in paragraphs 28 to 32.

44. Similar filters can be applied to those in paragraphs 35 and 37 to identify students counted in a particular row.

Funding tables

45. This section details how the 2020-21 funding allocations can be modelled using the 2019-20 HESA Student data, where HESES19 data has previously been used.
46. Within these tables the columns titled '2020-21 allocation using HESES19 data (£)' and 'Calculations using HESES19 data' are the figures shown in the latest 2020-21 grant tables. Some of these values may not match the grant tables if there have been any amendments to HESES19 data since the grant announcement or where mergers have taken place.
47. The columns titled '2020-21 allocation using 2019-20 HESA Student data (£)' and 'Calculations modelled using 2019-20 HESA Student data' contain values from the 2019-20 HESA Student data, and calculations that are based on this data.
48. The columns titled 'Difference (£)' are the figures calculated using 2019-20 HESA Student data minus the figures calculated using HESES19 data.

Table A: 2020-21 Summary of allocations

49. This table is a summary of the teaching grant allocations shown in Tables B, C, D, E and F. This table will be used to identify unusual differences at a high level; the tables on the five other sheets can then be used to look at the differences in more detail.

Table B: 2020-21 High-cost subject funding

50. This table shows the calculation of 2020-21 high-cost subject funding.
51. 'FTEs from '1 Full-time', '2 Sandwich' and '3 Part-time' is the sum of Column 4 of the '1 Full-time' tab, Column 4 of the '2 Sandwich' tab multiplied by 0.5 and Column 4a of the '3 Part-time' tab.
52. 'Additional NMAH cohort: UG FTEs (excl. DHDT) from '6 Health' is the sum of full-time undergraduate students from Column 4(b)(i) of the '6a Health full-time' tab, sandwich year out undergraduate students from Column 4(b)(i) of the '6b Health sandwich' tab multiplied by 0.5 and part-time undergraduate students taken from Column 4a(b)(i) of the '6c Health part-time' tab.
53. 'Additional NMAH cohort: PGT FTEs from '6 Health' is the sum of full-time postgraduate students taken from Column 4(b)(ii) of the '6a Health full-time' tab and part-time postgraduate students taken from Column 4a(b)(ii) of the '6c Health part-time' tab.
54. 'Additional NMAH cohort: DHDT FTEs from '6 Health' is the sum of full-time undergraduate students taken from Column 4(b)(ii) of the '6a Health full-time' tab, sandwich year out undergraduate students from Column 4(b)(ii) of the '6b Health sandwich' tab multiplied by 0.5 and part-time undergraduate students taken from Column 4a(b)(ii) of the '6c Health part-time' tab.
55. 'Adjustment for over-recruitment against medical and dental intake targets' is taken from column H.
56. 'Other FTE adjustments' is taken from column I.

57. 'Total FTEs for 2020-21 high-cost subject funding' is the sum of the FTEs in columns L to Q.
58. 'High-cost subject funding (£)' is the 'Total FTEs for 2020-21 high-cost subject funding' multiplied by the rates of funding and scaling factor shown on the 'G Parameters' tab.

Table C: 2020-21 Nursing, midwifery and allied health supplement

59. This table shows the calculation of the 2020-21 Nursing, midwifery and allied health supplement.
60. 'FTEs from '6a Health full-time', '6b Health sandwich' and '6c Health part-time' are taken from '6a Health full-time', '6b Health Sandwich' and '6c Part-time' of this workbook. It includes the following sections:
- a. 'Full-time and sandwich year out', 'OfS-fundable' is the sum of OfS-fundable full-time students taken from Column 4(a) of the '6a Health full-time' tab and sandwich year out students taken from Column 4(a) of the '6b Health sandwich' tab multiplied by 0.5.
 - b. 'Full-time and sandwich year out', 'Additional cohort' is the sum of full-time students taken from Column 4(b)(i) and Column (b)(ii) of the '6a Health full-time' tab and sandwich year out students taken from Column 4(b)(i) and Column 4(b)(ii) of the '6b Health sandwich' tab multiplied by 0.5.
 - c. 'Part-time', 'OfS-fundable' is taken from Column 4a(a) of the '6c Health part-time' tab.
 - d. 'Part-time', 'Additional cohort' is taken from Column 4a(b)(i) and Column 4a(b)(ii) of the '6c Health part-time' tab.
61. 'FTE adjustment' is taken from column G.
62. 'Total FTEs for nursing, midwifery and allied health supplement' is the sum of the FTEs in columns J to N.
63. The 'Nursing, midwifery and allied health supplement (£)' column is the 'Total FTEs for nursing, midwifery and allied health supplement' multiplied by the rate of funding for that profession and level, as shown on the 'G Parameters' tab.

Table D: 2020-21 Erasmus+ and overseas study programmes

64. This table shows the calculation of the 2020-21 Erasmus+ and overseas study programmes allocation.
65. The '2019-20 years countable from '4 Year abroad'' are the fundable and non-fundable, full-time and sandwich year out years countable, taken from Columns 1 and 2 of the '4 Year abroad' tab. Sandwich year out years countable on outgoing years abroad outside the Erasmus+ programme are not included.
66. 'Total years countable for Erasmus+ overseas study programmes' is the sum of Columns 1 and 2 of the '4 Year abroad' tab.

67. 'Erasmus+ and overseas study programmes (£)' is the 'Total years countable for Erasmus+ and overseas study programmes' multiplied by the rate of funding shown on the 'G Parameters' tab.

Table E: 2020-21 Other high-cost targeted allocations

68. This table shows the calculation of other targeted allocations.

69. 'FTEs from '1 Full-time', '2 Sandwich' and '3 Part-time' is the sum of Column 4 of the '1 Full-time' tab, Column 4 of the '2 Sandwich' tab multiplied by 0.5 and Column 4a of the '3 Part-time' tab.

70. 'Additional NMAH cohort: UG FTEs (excl. DHDT) from '6 Health' is the sum of full-time undergraduate students from Column 4(b)(i) of the '6a Health full-time' tab, sandwich year out undergraduate students from Column 4(b)(i) of the '6b Health sandwich' tab multiplied by 0.5 and part-time undergraduate students taken from Column 4a(b)(i) of the '6c Health part-time' tab.

71. 'Additional NMAH cohort: PGT FTEs from '6 Health' is the sum of full-time postgraduate students taken from Column 4(b)(ii) of the '6a Health full-time' tab, sandwich year out postgraduate students from Column 4(b)(ii) of the '6b Health sandwich' tab multiplied by 0.5 and part-time postgraduate students taken from Column 4a(b)(ii) of the '6c Health part-time' tab.

72. 'Additional NMAH cohort: DHDT FTEs from '6 Health' is the sum of full-time undergraduate students from Column 4(b)(ii) of the '6a Health full-time' tab, sandwich year out undergraduate students from Column 4(b)(ii) of the '6b Health sandwich' tab multiplied by 0.5 and part-time undergraduate students taken from Column 4a(b)(ii) of the '6c Health part-time' tab.

73. 'Adjustment for over-recruitment against medical and dental intake targets' is taken from column I.

74. 'FTE adjustments from 2020-21 grant tables' is taken from column J.

75. 'Total FTEs for 2020-21 other targeted allocations' is the sum of the FTEs in columns P to U.

76. 'Postgraduate taught supplement (£)' is the 'Total FTEs for 2020-21 other targeted allocations' multiplied by the postgraduate taught supplement parameters shown on the 'G Parameters' tab.

77. 'Intensive postgraduate provision (£)' is the 'Total FTEs for 2020-21 other targeted allocations' multiplied by the intensive postgraduate parameters shown on the 'G Parameters' tab.

78. 'Accelerated full-time undergraduate provision (£)' is the 'Total FTEs for 2020-21 other targeted allocations' multiplied by the accelerated full-time undergraduate provision parameters shown on the 'G Parameters' tab.

79. 'Students attending courses in London (£)' is the 'Total FTEs for 2020-21 other targeted allocations' multiplied by the students attending courses in London parameters shown on the 'G Parameters' tab.

Table F: 2020-21 Student premium allocations

80. This table shows the calculation of 2020-21 student premium allocations.

81. **Premium to support successful student outcomes: full-time (main allocation and supplement).** The figure in the 'Total FTEs for 2020-21 Full-time and sandwich year out UG' row is the total FTE for full-time and sandwich year out UGs from the 'Total FTEs for 2020-21 other targeted allocations' column in 'E Other high-cost TAs'.

82. **Premium to support successful student outcomes: part-time.** The figure in the 'Total FTEs for 2020-21: Part-time UG' row is the total FTE for part-time UGs from the 'Total FTEs for 2020-21 other targeted allocations' column in 'E Other high-cost TAs'.

83. **Disabled students' premium.** The 'Total FTEs for 2020-21' figure is the total FTE for all modes and levels from the 'Total FTEs for 2020-21 other targeted allocations' column in 'E Other high-cost TAs'.
