Summary	2
Publication of 2022 NSS data	3
NSS data dissemination portal	3
Further information	4

Publication for:

- Higher education providers and further education colleges in England
- Other providers in England who participate in the National Student Survey
- Higher education providers and further education colleges in Northern Ireland

The Higher Education Funding Council for Wales and the Scottish Funding Council will write separately to providers in their nations.

Summary

1. The National Student Survey (NSS) is managed by the Office for Students (OfS) on behalf of the UK funding and regulatory bodies – the Department for the Economy (Northern Ireland), the Scottish Funding Council and the Higher Education Funding Council for Wales. The survey provides information for prospective students and for stakeholders to support a high-quality learning experience.
2. The survey is delivered on behalf of the UK funding and regulatory bodies by:
 - Ipsos MORI, which is administering the survey
 - Texuna Technologies, which will deliver the NSS Results Portal for providers.
3. This publication provides information on the plans for the publication of the 2022 NSS results.
4. In July 2022, there will be a UK-wide consultation on any proposed changes to the NSS, with the intention that any new developments be in place from 2023.
5. The OfS will publish separate information in May 2022 on the publication of the Unistats dataset.

Publication of 2022 NSS data

6. The OfS will publish the NSS 2022 public data on its website at **0930 on Wednesday 6 July 2022**.
7. Providers will be able to access their own detailed NSS results, including subject-level question responses and open text comments, through the NSS Results Portal at **0930 on Wednesday 6 July 2022**.
8. Publication and dissemination of the NSS 2022 results depends on final agreement from the UK funding and regulatory bodies following the quality review of the data. A decision on whether it is appropriate to aggregate the results with the 2021 NSS will also be made following analysis.
9. The OfS applies the Code of Practice for Statistics to the publication of NSS results data. More information about the Code of Practice can be found on the OfS website.¹

NSS data dissemination portal

10. Further technical information on the NSS Results Portal release will be made available in the Portal newsletter. This will be issued by Texuna to all active NSS contacts on the Portal in June 2022.
11. Texuna will be in touch with existing active provider contacts to request that contact details are confirmed or updated as appropriate in June 2022, ahead of the publication of the NSS data on the portal. Ensuring that these details are up to date will help providers access the portal for the NSS 2022 data quickly and easily.
12. From time to time, the underlying dataset for the portal may be subject to minor changes and amended during the year. However, the static reports available through the portal will not be updated for minor changes. Static reports should therefore be understood as capturing a snapshot of the data, correct at the time of publication.
13. As in 2021, alongside the NSS 2022 results, an average agreement rate based on the results from 2020, 2021 and 2022, with each year weighted evenly, will be published. We are actively seeking feedback on this data and will review it ahead of the 2023 results publication.
14. NHS placement questions will not be published as part of the NSS 2022 data on the OfS website. Providers will be able to receive their own responses to these questions through the portal.
15. For 2022, there are some minor changes to the portal, as follows:
 - The 'gender' category label will change to 'sex'. This more accurately reflects the available values in this category, which are predominantly derived from the HESA SEXID field. The values within this split will not change for 2022.

¹ See www.officeforstudents.org.uk/data-and-analysis/producing-statistics/.

- In previous years, static reports generated from the portal have been in both xls and xlsx formats. However, in 2022 and future years, all static reports generated from the Portal will be in the xlsx format.
- The 2021 survey included questions about the impact of COVID-19 on the student experience. These questions were not repeated in the 2022 survey and so no related data will be available. The COVID-19 data from the 2021 survey will remain in the 2021 static reports and can still be checked in custom reports.
